

A unique service that brings multi-asset strategies and advanced analytics to private Investors.

MISSION

Global Asset has always had a clear mission: To offer effective market strategies and analysis designed to support the financial industry, from fund managers to wealth managers, from private bankers to family offices.

However, the tools and accessibility for private investors is changing rapidly but access to profitable and sophisticated financial instruments remains complex.

For this reason, we have built BLUEPRINT a new service that replicates our analysis and strategies directly on leading online brokers.

Now retail investors can benefit from the same advanced techniques and portfolios that Global Asset provides to industry professionals.

WHAT IS BLUEPRINT?

BLUEPRINT is much more than copytrading.

Instead of simply replicating the trades of other traders BLUEPRINT provides you with multi-asset portfolios each composed of a selection studied selection of financial assets that work together to optimize stability and return potential.

The same portfolios that we at Global Asset develop for industry professionals are now available also for individuals with a structure that is transparent and searchable at all times.

HOW BLUEPRINT WORKS

Access is simple: just select one of Global Asset's approved brokers.

Once the BLUEPRINT service is activated, our analyses and strategies will be executed automatically on behalf of the Investor.

Each trade is controlled by a system that ensures constant monitoring and accuracy of investment decisions.

Another advantage of BLUEPRINT is the ability to enter and exit investments completely free*.

There are no entry or exit fees, and the capital always remains in the full disposal of the investor who can decide at any time to close or withdraw their funds without complex procedures*.

* Check the conditions offered by the referring broker.

WHY CHOOSE BLUEPRINT

One of the greatest advantages of BLUEPRINT is the possibility of diversification.

Investors can choose from several portfolios each with a unique and selected composition.

They can also decide to activate more than one portfolio at the same time so as to further distribute risk according to their own preferences and financial goals.

In this way, BLUEPRINT not only provides a flexible experience but also allows them to create a true diversification strategy that is the basis of a prudent and balanced approach to investing.

TRANSPARENCY AND EASE OF CONSULTATION

In BLUEPRINT portfolios, every asset and data is fully visible and easily searchable.

This means that the investor can closely monitor the composition and performance of the portfolio, having all the details needed for transparent and informed management.

Unlike traditional financial products where specific assets are often hidden or difficult to understand BLUEPRINT guarantees comprehensive information that is always accessible.

AN INNOVATIVE SERVICE FOR TODAY'S INVESTORS

BLUEPRINT is designed specifically for people who want to invest with advanced tools without high constraints or hidden costs.

It is a service designed to make professional strategy management accessible to anyone with total flexibility over their capital.

Anyone, in fact, can access BLUEPRINT with even small amounts of capital, with no obligations of permanence* and with the freedom to exit at any time*.

* Check the conditions offered by the referring broker.

A NEW STRANDARD FOR PRIVATE INVESTORS

BLUEPRINT is not just a service but a new standard for private investor with access to the same multi-asset strategies that large funds and institutional investors support.

Now the investor can feel part of a more advanced financial world with transparency, flexibility, and tested professional strategies.

To start using BLUEPRINT, all you need to do is choose your broker from those selected and activate the portfolio you prefer.

From there Global Asset will do the rest by providing automated and monitored execution of analysis and strategies to deliver a complete and profitable investment experience.

INNOVATION

BLUEPRINT is the innovation designed for those who want to get more from their investment.

With BLUEPRINT investing becomes a new experience and transparent experience accessible even to those who do not have large amounts of capital or do not want to lose control over their investments.

With us, the private investor finally has access to advanced strategies without compromise.
